Go Low Rates as low as 0%

GoGreen Financing is working with select participating lenders to reduce their already low interest rates—sometimes as low as 0%! Find your Go Low lender on the list above.

[1] All listed finance companies offer financing for distributed generation and storage such as solar panels and batteries. However, finance companies will not receive a credit enhancement for that portion of their financing. As such, these installations may be financed at the discretion of the finance company. [2] Please note: properties that already have HUD-backed financing cannot be considered.
